Gypsy Becomes Unmanageable at Its Winter Quarters.

The Big Elephant Adds Another Victim to Its List of Dead Kitchens.

Frank Scott has Every Bone in His Body Broken by the Elephant's Trunk. The Elephant Was Injured by the Elephant's Trunk.

CHICAGO, March 26.—W. H. Harris big elephant (Gypsy) became unmanageable at its winter quarters Wednesday afternoon and before it was quieted had killed her keeper, took down a frame building and created general excitement which drew thousands of people to the scene.

Harris' circus is quartered at the corner of Polk and Jackson streets in a story block. In the afternoon it occupies the greater part of the first floor, and was temporarily in charge of Frank Scott, a lion tamer. Wednesday afternoon Scott, accompanied by Harris, proceeded for a ride in the alley. Gypsy did not seem inclined to stop at the boundary of the alley, and Scott gave her a job with an iron hook. The beast became enraged and throwing the man from her back, where he had been riding, proceeded to pound him with her trunk, breaking every bone in the man's body. Harris came to the rescue with a pickaxe. She was knocked down but pluckily jumped up and commenced battle. She soon had blood streaming from wounds in the elephant's side, and the beast ran away from the end of the alley. Here was standing a large crowd and many people received bruises in the confusion which took place when the elephant started out of the alley. Gypsy did not go far, but the crowd followed who in the meantime had been moved into a wooden building just opposite the elephant's quarters. The animal wrecked in the whole side of the building in her efforts to get at the man again.

During this time Mr. Harris had sent for many loaves of bread and all the cake that could be bought in the neighborhood, and also telephoned for Hattie Orton, his housekeeper, who soon arrived. The elephant quieted down somewhat while he was eating 50 loaves of bread, a large number of cakes and other delicacies which were placed before her. After she had finished eating she walked in her bare trunk in the crowd, and she was then quieted. The door had no sooner been shut than the elephant with one blow shattered it and ran out again. At this time every street in the vicinity was crowded with excited people. Three wagon loads of police came to the scene and did nothing further than keeping back the crowd. The elephant had her own way for about four hours when she was taken back into her stall and allowed Orton to chain her.

Frank Scott's right name is unknown. He could never tell who he was, and although he has been with Harris' circus for six years no one knows anything of him except that he went under an assumed name.

Gypsy is only another name for Emma, the first elephant imported into this country. The killing of Scott makes the seventh victim of the vicious character. The first was Harry Cooley in 1870 at Poughkeepsie's winter quarters in Philadelphia, then George West had the life crushed out of him in 1874, traveling on the road with Robinson's show, "St. L. Bay, the Bum," was the next victim at New Haven, La. in 1881, followed by Sam Devoe, with O'Brien's show at Poughkeepsie, N. Y., in 1883. Patsy Hauligan was the sixth victim and he had his arm torn out at Cincinnati in 1894, and died two days afterward.

Mr. Shea has been Gypsy's keeper off and on for the past ten years and says he never had any trouble with her.

APPEARANCE SHORTAGE

In the Accounts of County Treasurer May Cobb Dictated.

LINCOLN, Neb., March 26.—An apparent shortage of \$30,000 in the accounts of County Treasurer May Cobb was disclosed Wednesday by the report of State Auditor F. J. McLaughlin to the commissioners. This is what the books show, but Mr. Cobb claims his collectors, which will materially lessen if not wipe out the apparent shortage. This comprises checks from heavy taxpayers which he agreed not to present to the banks for the time being. It is claimed, however, that the treasurer had on deposit in the German national and Lincoln savings, two banks which recently failed, something over \$30,000 and this, it is feared, is almost wholly lost. No formal action has yet been taken by the commissioners.

Dr. Joseph Chamberlain Makes an Address at the Dinner of the Canada Club in London.

LONDON, March 26.—Right Hon. Jos. Chamberlain, secretary of state for the colonies, was the guest of honor at the annual dinner of the Canada club in London Wednesday evening. The president of the club, Sir John Lubbock, proposed a toast to the governor-general of Canada and the hon. Chamberlain, coupling the names of Mr. Chamberlain and Mr. Montagu.

Upon Mr. Chamberlain rising to respond he was loudly cheered. He declared that, wherever he went, his greatness, Canada stood forth first among the group of kindred nations which, together with the United Kingdom, formed the British empire. He had often visited Canada, he said, and knew men on both sides of the Atlantic who once assumed that the main destiny of Canada was to be absorbed by the republic upon her southern frontier. That ancient contention, Mr. Chamberlain declared, was in contrast with the present determination of Canada to maintain her level institutions and draw closer to the United Kingdom, and to the United States, and to all the colonies, and, especially from Canada, an outburst of loyalty and affection. To none of her majesty's subjects was the result shadow of war more ominous than to Canada; yet there was no hesitation on her part; and she was determined to maintain her position with the United Kingdom.

Her son, who was nine years old, saw his mother being attacked and he rushed to her aid. He met the tramp as he was leaving, and attacked him. The tramp showed fight and got the best of the boy, but the boy was not hurt. The father called to the boy for assistance, who struck the tramp over the head with a knife, killing him. The father then fled, and the boy followed him down and, finding him senseless, the boy then got up and ran to the police station.
